General SVE AS Results (003).xlsx

Gary,

Attached is an excel spreadsheet that includes several sites where SVE and AS/SVE has been used successfully in Wisconsin. The spreadsheet includes some basic information along with a link to more information accessible through our BRRTS database. In the BRRTS database, closed sites have a link to a "GIS Packet" which is the closure form that includes site details. Several sites are not closed but other site information is linked to give a few more details. I am out of the office today but am available by cell phone if you have any questions. (414) 507-5571.

We are committed to service excellence.

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.

Subject: Tower Standard

Hi Judy—

Nice to see you again on Tuesday!

I had another question with respect to the Tower Standard / Haskell Lake site that we've been taking about:

Can you think of other LUST sites that have been cleaned up under the PECFA program that have successfully used AS/SVE alone? Mike Harris was thinking that perhaps if we could identify a few of these kinds of sites, we could contact the site owners to see if they were satisfied with the results -- and perhaps were even willing to say as much in an upcoming teleconference with the LDF tribe. Chris Saari had given us info on two such sites, but Bob Egan told me that it was not clear if the sites were still active.

Thanks, Judy.

Gary
